- 3) If a medical certificate is presented. Service will not be terminated for thirty (30) days beyond the termination date if a physician, registered nurse or public health officer certifies in writing that termination of service will aggravate a debilitating illness or infirmity on the affected premises. The utility may refuse to grant consecutive extensions for medical certificates past the original thirty (30) days unless the certificate is accompanied by an agreed partial payment plan. The utility will not require a new deposit from a customer to avoid termination of service for a thirty (30) day period who presents to the utility a medical certificate certified in writing by a physician, registered nurse or public health officer.

L. Meter Testing:

1. Water meters will be tested before being installed for use by any customer. The water meter will be in good working order and adjusted as close to the optimum operating tolerance as possible, in accordance with Public Service Commission Rules and Regulations.
2. The utility may have all or part of its meter testing performed by another utility or agency approved by the Public Service Commission. The utility will notify the Public Service Commission of the make, type, and serial number of standards used for testing.
3. The utility cannot place in service any basic measurement standard unless the Public Service Commission has approved the calibration. The Public Service Commission will be notified promptly of the adoption or deletion of any basic standards requiring approval of the calibration.
4. Meter testers must be certified by the Public Service Commission. Certified meter testers will perform tests as necessary to determine the accuracy of the utility's meters and to adjust the utility's meters to the degree of accuracy required by the rules and regulations of the Public Service Commission.

M. Meter Test Records:

1. A complete record of all meter tests and adjustments and data sufficient to allow checking of test calculations will be recorded by the meter tester. Such record will include: information to identify the unit and its location; date of tests; reason for such tests; readings before and after test; statement of "as found" and "as left" accuracies sufficiently complete to permit checking of calculations employed; notations showing that all required checks have been made; statement of repairs made, if any; identifying number of the meter; type and capacity of the meter; and the meter constant. The complete record of tests of each meter will be continuous for at least two (2) periodic test periods and will in no case be less than two (2) years.
2. The utility will keep numerically arranged and properly classified records for each meter owned, used and inventoried by the utility. The identification number, date of purchase, name of manufacturer, serial number, type, rating, and name and address of each customer on whose premises the meter has been in service with date of installation and removal will be included in the records. These records will also contain condensed information concerning all tests and adjustments including dates and general results of such adjustments. The records will reflect the date of the last test and indicate the proper date for the next periodic test required by the applicable Public Service Commission rule and/or regulation.
3. Upon completion of adjustment and test of any meter pursuant to Public Service Commission rules and regulations, the utility will affix to the meter a suitable seal in such a manner that adjustments or registration of the meter cannot be altered without breaking the seal.

N. Customer Requested Meter Tests:

1. The utility will make a test of any meter upon written request of any customer if the request is not made more frequently than once every twelve (12) months. The customer shall be given the opportunity to be present at the requested test. If the test shows that the meter was not more than two (2) percent fast, the utility will make a reasonable charge for the test, the amount being approved by the Public Service Commission and set out in the utility's tariff.
2. After having first obtained a test from the utility, any customer of the utility may request a meter test by the Public Service Commission upon written application. Such request shall not be made more frequently on one (1) meter than once every twelve (12) months.

O. Access to Property:

1. The utility shall at all hours have access to meters, service connections, and other property owned by it and located on customer's premises for purposes of installation, maintenance, meter reading, operation, replacement or removal of its property at the time service is terminated. Any employee of the utility whose duties require him/her to enter the customer's premises will wear a distinguishing uniform or other insignia identifying him/her as an employee of the utility, or show a badge or other identification which will identify him/her as an employee.
2. Obtaining easements and right-of-ways necessary to extend service will be the responsibility of the utility.
3. All customers must grant, convey, or cause to be granted or conveyed to the utility a perpetual easement and right-of-way across any property owned or controlled by the customer wherever necessary for the utility's facilities in order to provide service.
4. The utility cannot require a prospective customer to obtain easements or rights-of-way on property not owned by the prospective customer as a condition for providing service. However, the cost of obtaining easements or rights-of-way will be included in the total per foot cost of an extension, and will be apportioned among the utility and customer in accordance with the applicable extension administrative regulation.

R. System Inspections:

1. The utility will adopt inspection procedures to assure safe and adequate operation of its facilities and compliance with Public Service Commission rules and regulations. These procedures will be filed with the Public Service Commission for review.
2. Upon receipt of a report of a potentially hazardous condition at any utility facility made by a qualified employee, public official, or customer, the utility will inspect all portions of the system which are the subjects of the report.
3. Appropriate records will be kept by the utility to identify the inspection made, deficiencies found and action taken to correct the deficiencies.
4. Inspections. The utility will make systematic inspections of its system in the manner set out below to insure that the Public Service Commission's safety requirements are being met. These inspections will be made as often as necessary but not less frequently than is set forth below for various classes of facilities and types of inspection.
 - a) The utility will annually inspect all structures pertaining to source of supply for their safety and physical and structural integrity, including dams, intakes, and traveling screens. The utility will semiannually inspect supply wells, their motors and structures, including electric power wiring and controls for proper and safe operation.
 - b) The utility will annually inspect all structures pertaining to purification for their safety, physical and structural integrity and for leaks, including sedimentation basins, filters, and clear wells; chemical feed equipment; pumping equipment and water storage facilities, including electric power wiring and controls; hydrants, mains, and valves.
 - c) The utility will monthly inspect construction equipment and vehicles for defects, wear, operational hazards, lubrication, and safety features.

S. Reporting of Accidents, Property Damage, or Loss of Service:

1. Within two (2) hours following discovery the utility will notify the Public Service Commission by telephone or electronic mail of any utility related accident which results in:
 - a) Death; or shock or burn requiring medical treatment at a hospital or similar medical facility, or any accident requiring inpatient overnight hospitalization;
 - b) Actual or potential property damage of \$25,000 or more; or
 - c) Loss of service for four (4) or more hours to ten percent (10%) or 500 or more of the utility's customers, whichever is less.
2. A summary written report will be submitted by the utility to the Public Service Commission within seven (7) calendar days of the utility related accident.

T. Continuity of Service:

1. Emergency interruptions. The utility will make all reasonable efforts to prevent interruptions of service and when such interruptions occur will endeavor to reestablish service with the shortest possible delay consistent with the safety of its consumers and the general public. If an emergency interruption of service affects service to any public fire protection device, the utility will immediately notify the fire chief or other public official responsible for fire protection.
2. Scheduled interruptions. If the utility finds it necessary to schedule an interruption of its service, it will notify all customers to be affected by the interruption, stating the time and anticipated duration of the interruption. Whenever possible, scheduled interruptions will be made at hours of least inconvenience to customers. If public fire protection is provided by mains affected by the interruptions, the utility will notify the fire chief or other officials responsible for fire protection of the interruption, stating the time and anticipated duration. The fire chief or other official responsible for fire protection will be notified immediately upon restoration of service.
3. Record of interruptions. The utility will keep a complete record of all interruptions on its entire system. This record will show the cause of interruption, date, time, duration, remedy and steps taken to prevent recurrence.

RULES AND REGULATIONS

U. Pressures:

1. Standard pressure. The utility will maintain a standard pressure in its distribution system at locations to be designated as the point or points of "standard pressure." The selection of such points will be confined to locations fairly representative of average conditions. In selecting points for fixed standard pressure, the utility may divide its distribution system into districts if division is necessary due to differences of elevation or loss of pressure because of friction, or both, and may either adopt a standard pressure for each division or establish a single standard pressure for its distribution system as a whole. In no case will the constant difference between the highest and lowest pressures in a district for which a standard has been adopted exceed fifty percent (50%) of such standard. The utility may, in extenuating circumstances, furnish service that does not comply with the foregoing specifications if the customer is fully advised of the conditions under which average service may be expected. The Public Service Commission, upon investigation, may require improvements when it appears right and proper that such upgrades should be made. In no event, however, will the pressure at the customer's service pipe under normal conditions fall below thirty (30) psig nor will the static pressure exceed 150 psig.
2. Pressure surveys. At least once a year the utility will make a survey of pressures in its distribution system of sufficient magnitude to indicate the quality of service being rendered at representative points in its system. Pressure charts for these surveys will show the date and time of beginning and end of the test and the location at which the test was made. Records of these pressure surveys will be maintained at the utility's office and will be made available to the Public Service Commission upon request.

V. Service Lines & Connections:

1. The utility will furnish and install at its own expense for the purpose of connecting its distribution system to the customer's premises that portion of the service connection from its main to and including the meter and meter box. The utility will recoup this expense from the customer in accordance with KRS 278.0152.
2. In areas where the distribution system follows well-defined streets and roads, the customer's point of service will be located at that point on or near the street right-of-way or property line most accessible to the utility from its distribution system. In areas where the distribution system does not follow streets and roads, the point of service will be located as near the customer's property line as practicable. Prior to installation of the meter the utility will consult with the customer as to the most practical location.
3. Depth of service line. All service lines must be laid at a sufficient depth per Kentucky State Plumbing Code Requirements to prevent freezing during the coldest weather normally experienced except where services are not intended for use during freezing weather and are actually drained during such periods.
4. A plumbing permit or Homestead Exemption from the appropriate regulatory agency is required before the utility can set the meter.
5. The applicant/customer must furnish and lay the necessary pipe to make the connection from the point of service to the point of usage and be financially responsible for all costs associated with the installation and maintenance of his/her service line plumbing, including a shut-off valve and one-way check valve, installed on his/her property beginning at the outlet side of the water meter. The service line must be kept in good repair and in accordance with utility and Public Service Commission rules and regulations.
6. The installation and maintenance of the water service line must be in accordance with the rules and regulations of the Kentucky Department of Health.
7. A cross-connection of the utility's system with any other source is strictly prohibited.
8. A well that has or is being used on the premises must be inspected by utility personnel to verify disconnection and separation.

9. All service lines on the customers side of the meter must consist of copper or PVC pipe with a rating of no less than 200 psi, and should not be less than 3/4 inches.
10. Absolutely no galvanized pipe or fittings can be used in the installation.
11. The utility will not set a meter on a customer's service line at a point that does not deliver 30 psig at the meter.
12. If the applicant/customer's point of usage is at a higher elevation than the meter, the customer should consult with a reputable engineering firm to properly size the service line from the meter to the point of usage.
13. Should an applicant/customer desire a higher pressure due to location or other need, provisions must be made by the applicant for an individual pressure booster system. The manner of connection, location cross-connection protection and type is subject to approval by the utility. The utility reserves the right to require discontinuance and disconnection should the private booster system have a detrimental effect on the utility's system.
14. Piping on the premises of the applicant/customer must be installed so that connections are conveniently located with respect to the utility's lines and mains. A place must be provided for metering that is unobstructed and accessible at all times.
15. The utility may require the applicant customer at his/her own expense, to install a back-flow preventer and/or pressure regulator.
16. All meters will be installed, renewed, and maintained at the expense of the utility, and the utility reserves the right to approve the size and type of meter used.
17. All taps and connections to the mains of the utility must be made by and/or under the direction and supervision of utility personnel and will incur a meter connection tap-on charge, an amount that has been approved by the Public Service Commission for such service. Payment of this fee is for the privilege of connecting to the water system and the payment of the fee does not constitute the purchase of a water meter.
18. Any customer having boilers and/or pressure vessels that receive water from the utility must have a check valve on the water supply line and a vacuum valve on the steam line in order to prevent a collapse where the water supply from the utility may be interrupted or discontinued. (D)

RULES AND REGULATIONS

- W. **Leak Adjustments:** A customer will be allowed one (1) leak adjustment per twelve month period per meter:
1. Upon written request and approval leak adjustments will be granted to all customers.
 2. The customer must provide a plumber's statement or list of materials showing that the leak has been repaired.
 3. If approved, the bill will be adjusted by comparing the usage during the leak billing period to the average usage for the past twelve billing periods. A reasonable estimate will be used in cases when twelve prior periods of information do not exist.
 4. The customer's bill will be based on two components. The first step will be to calculate the customer's average monthly usage over a twelve-month period. The second step will be to deduct the customer's average monthly usage (as calculated in the above) from the total amount of water that passed through the meter. The usage calculated in step one will be billed at the utility's regular rates, while the remaining usage will be charged at the per thousand gallon leak adjustment rate, as set forth in the rates and charges portion of the utility's approved tariff. All water passing through the meter must be accounted and paid for by the customer. So the customer will owe the amount of his/her average bill plus the per thousand gallon leak adjustment rate for the remainder of the water that passed through the meter.
 5. If meter readings are not available for an entire twelve-month period, the water bill will be estimated by the utility, subject to an upward or downward adjustment once a twelve-month average of actual meter readings can be calculated.
 6. Only one (1) leak adjustment will be made during a twelve-month period, and each adjustment may cover a maximum of two (2) billing periods.
 7. Plastic pipe for repair of underground water service lines must be certified to withstand a working pressure of 200 lbs. per square inch or greater.

Z. Legal Disclaimers:

1. The utility shall in no event be held responsible for any claims made against it for reasons of system failure or interruption of service. No persons shall be entitled to damages or for any portion of a payment refunded for any system failure or interruption of service which in the opinion of the utility is deemed necessary.
2. No person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance or equipment which is a part of the utility's water system. Any person violating this provision will be subject to immediate arrest and/or discontinuance of water service and shall pay the cost of repairing or replacing the utility's facilities.
3. If any loss or damage to the property of the utility or any accident or other injury to persons or property is caused by or results from the negligence or wrongful action of a customer, members of his/her household, his/her agent or employee, the cost of necessary repairs or replacements shall be paid by the customer of the utility and any liability otherwise resulting shall be that of the customer.
4. For purposes of fire protection, including any customer's fire protection system, the utility cannot guarantee a water supply at any particular flow rate or pressure. The fire flow may vary depending upon other water demands on the system, various water facility limitations, or other circumstances. The customer will indemnify and hold harmless the utility and its employees from and against all claims, damages, losses, and expenses incurred as a result of insufficient water supply or deficient system facilities.

RULES AND REGULATIONS

AA. Fire Departments:

Any city, county, urban-county, charter county, fire protection district, or volunteer fire protection district ("User") may withdraw water from the utility's water distribution system for fighting fires or training firefighters at no charge on the condition that it maintains estimates of the amount of water used for fire protection and training during the calendar month and reports the amount of this water usage to the utility no later than the 15th day of the following calendar month.

Any User that withdraws water from the utility's water distribution system for fire protection or training purposes and fails to submit the required report on water usage in a timely manner shall be assessed the cost of this water. A User shall submit a monthly report even it withdraws no water for fire protection or training purposes.

A non-reporting User's usage shall be presumed to be 0.3 percent of the utility's total water sales for the calendar month. A non-reporting User may present evidence of its actual usage to rebut the presumed usage. The utility shall consider this evidence and shall adjust the presumed usage amount accordingly.

The non-reporting User shall be billed for this usage at the lowest usage block rate regardless of customer classification that the utility charges.

A non-reporting User shall also be assessed a penalty of \$5.00 for each failure to submit a report in a timely manner.

RULES AND REGULATIONS

AB. Fire Hydrants:

1. In accordance with Public Service Commission Rules and Regulations, a new fire hydrant will not be installed unless:
 - a) A professional engineer with a Kentucky registration has certified that the system can provide a minimum fire flow of 250 gallons per minute, and
 - b) The system supporting this flow has the capability of providing this flow for a period of not less than two (2) hours plus consumption at the maximum daily rate.
2. The location, installation, and the responsibility for maintenance of fire hydrants, public and private fire protection facilities, connecting mains, and their ownership may be subject to negotiation between the utility and the applicant/customer. Fire hydrants and public and private fire protection facilities shall be installed as required by the utility and if owned by the utility shall be subject to any conditions the Public Service Commission may impose, based upon the compensation received for this service.

RULES AND REGULATIONS

AE. Water Main Extensions:

1. Normal extension. Other than the approved meter connection/tap-on charge, an extension of fifty (50) feet or less shall be made by a utility to its existing distribution main without charge for a prospective customer who shall apply for and contract to use service for one (1) year or more.
2. Other extensions.
 - a) When an extension of the utility's main to serve an applicant or group of applicants amounts to more than fifty (50) feet per applicant, the utility may require the total cost of the excessive footage over fifty (50) feet per applicant/customer to be deposited with the utility by the applicant or the applicants, based on the average estimated cost per foot of the total extension. Such deposit shall be refundable to the customer in certain instances, in accordance with Public Service Commission Rules and Regulations.
 - b) When an extension of the utility's main to serve an applicant or group of applicants amounts to more than fifty (50) feet per applicant, the utility will require the applicant(s) to sign an agreement between the utility and the property owner (applicant/customer) that specifically define the responsibilities of each party with regards to the extension.
 - c) Each customer who paid for service under such extension will be reimbursed under the following plan:

For a period of five (5) years after construction of the extension, each additional customer whose service line is directly connected to the extension installed, and not to extensions or laterals therefrom, will be required to contribute to the cost of the extension based on a recomputation of both the utility's portion of the total cost and the amount contributed by the customers. The utility will refund to those customers that have previously contributed to the cost of the extension that amount necessary to reduce their contribution to the currently calculated amount for each customer connected to the extension. All customers directly connected to the extension for a five (5) year period after it is placed in service must contribute equally to the cost of construction of the extension. In addition, each customer must pay the approved tap-on fee applicable at the time of his/her application for the meter connection. The tap-on fee will not be considered part of the refundable cost of the extension and may be changed during the refund period. After the five (5) year

refund period expires, any additional customer will be connected to the extension for the amount of the approved tap-on fee only. After the five (5) year refund period expires, the utility will be required to make refunds for an additional five (5) year period in accordance with Public Service Commission Rules and Regulations.

- 3. Nothing contained herein shall be construed to prohibit the utility from making extensions under different arrangements if such arrangements have received the prior approval of the Public Service Commission.
- 4. Upon complaint to and investigation by the Public Service Commission a utility may be required to construct extensions greater than fifty (50) feet upon a finding by the Public Service Commission that such extension is reasonable and that an extension of fifty (50) feet or less is unreasonable under the circumstances.

AF. Extension Procedures for Developers and/or Subdivisions:

1. Nothing contained herein shall be construed to prohibit the utility from contracting to make extensions under different arrangements if such arrangements have received the prior approval of the Public Service Commission.
2. An applicant desiring an extension to a real estate subdivision may be required to pay the entire cost of the extension. Under this plan, annually for a refund period of ten (10) years, the utility will refund to the applicant who paid for the extension a sum equal to the cost of fifty (50) feet of the extension installed for each new customer connected during the year whose service line is directly connected to the extension installed by the developer, and not to extensions or laterals therefrom. Total amount refunded will not exceed the amount paid to the utility. No refund will be made after the refund period ends.
3. The utility may also, upon Public Service Commission approval, contract privately with owners and/or developers of subdivisions for the installation of water service for the subject subdivision. The owners/developers, pursuant to these contracts, extend mains and install water service at their expense. The utility would not accept nor receive any contribution, cost reimbursement, or deposit from any customer (lot owner) in this circumstance and as contemplated by Public Service Commission Rules and Regulations.

WATER USER AGREEMENT

This Agreement entered into between _____, whose address is _____, hereinafter called "USER," and the CALDWELL COUNTY WATER DISTRICT, of 118 W. Market Street, Princeton, KY 42445, hereinafter called "SUPPLIER."

WHEREAS, the USER desires to purchase water from the SUPPLIER, and the parties hereby enter into this Water User Agreement as required by the Bylaws of the SUPPLIER.

NOW THEREFORE, in consideration of the mutual covenants, promises, and agreements herein contained, it is hereby understood and agreed by the parties hereto as follows:

The SUPPLIER shall furnish, subject to the limitations set out in its ByLaws and Rules and Regulations now in force or as hereafter amended, such quantity of water as the USER may desire in connection with the property to be served by this agreement. The property to be served is a _____, located on _____ (Residence, Mobile Home, etc.) Street, Highway, Road

The USER shall install and maintain at his own expense a service line which shall begin at the meter and extend to the dwelling or place of use. The location of the water meter will be determined by the SUPPLIER. The SUPPLIER shall purchase and install a cutoff valve and a water meter. The SUPPLIER shall have exclusive right to use such cutoff valve and water meter.

The USER shall connect his service lines to the water distribution system and shall commence to use water from the system on the date the water is available to him. **For new connections, it is understood and agreed that the USER will pay for service beginning on the date the meter setting is in place, regardless of whether the USER is connected to the system, or whether the USER is utilizing any water from the system. The amount charged will depend upon any usage, but at no time be less than the minimum bill for the USER'S appropriate customer classification. CHARGES WILL BE FOR A MINIMUM PERIOD OF 12 MONTHS.**

The tap on fee of the system is \$700.00. The USER agrees to pay a deposit of \$ _____ and on demand the balance of \$ _____ to the SUPPLIER. If the water system is constructed, but the property covered by this agreement is not reached by the SUPPLIER'S water line, the connection fee will be fully refunded to the USER. Construction of water lines to serve the property covered under this agreement depends upon feasibility, availability of funds for construction and approval of all local, state, and federal agencies having jurisdiction over this type of facility. **THE SUPPLIER DOES NOT GUARANTEE WATER SERVICE WILL BE MADE AVAILABLE TO THE USER.**

The USER agrees to comply with and be bound by the Articles, ByLaws and Rules and Regulations of the SUPPLIER, now in force or as hereafter duly and legally supplemented, amended, or changed. The USER agrees to pay for water at such rates, time and place as shall be determined by the SUPPLIER, and agrees to the imposition of such penalties for noncompliance as are now set out in the SUPPLIER'S ByLaws and Rules and Regulations, or which have been or hereafter be adopted and imposed by the SUPPLIER.

In the event the USER shall breach this agreement by refusing or failing, without just cause, to connect his service line to SUPPLIER'S distribution system as set forth above, the USER agrees to pay the SUPPLIER a lump sum of SEVEN HUNDRED DOLLARS AND NO/100 (\$700.00) as liquidated damages. It is expressly understood and agreed by the parties hereto that the said amount agreed upon as liquidated damages is equitable in that a breach by the USER in either of the respects set forth above would cause serious and substantial damages to the SUPPLIER, and it would be difficult, if not impossible, to prove the amount of such damages. The parties hereto have computed, estimated, and agreed upon said sum in an attempt to make a reasonable forecast of probable actual loss because of the difficulty of estimating with exactness the resulting damages.

The SUPPLIER shall determine the allocation of water to the USER in the event of a water shortage; and may shut off water to the USER if he allows a connection or extension to be made of his service lines for the purpose of supplying water to another party. In the event the total water supply shall be insufficient to meet all of the needs of the USERS, or in the event there is a shortage of water, the SUPPLIER may pro-rate the water available among ~~JEFFERSON COUNTY~~ **PUBLIC SERVICE COMMISSION** on such basis as is deemed equitable by the GOVERNING BODY of SUPPLIER, and if at any time the total water supply shall be insufficient to meet all the needs of all of the USERS, the SUPPLIER must first satisfy ~~all of the needs of all of the~~ **EXECUTIVE DIRECTOR** USERS, for domestic purposes before supplying any water for livestock purposes and ~~he needs of all~~ **TRIPLE BRANCH**

Burt Kirtley

EFFECTIVE
9/1/2011
PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

USERS for both domestic and livestock purposes before supplying any water for garden purposes.

The USER agrees that no present or future source of water will be connected to any waterlines served by the SUPPLIER'S waterlines and will disconnect from his present water supply prior to connecting to and switching to the SUPPLIER'S system (as certified by state plumbing inspectors) and shall eliminate present or future cross-connections in his system. The USER further agrees, at USER'S expense, to install a thermo expansion tank and/or a pressure-temperature relief valve on USER'S water system. Said thermo expansion tank and/or pressure-temperature relief valve to be approved by the Kentucky State Division of Plumbing Inspector. The failure of the USER to pay water charges duly imposed shall result in the automatic imposition of the following penalties:

1. Non-payment within TEN (10) days from the due date will be subject to a penalty of **10%** of the delinquent account.
2. Non-payment within THIRTY (30) days from the due date will result in the water being shut off from the USER'S property.
3. In the event it becomes necessary for the SUPPLIER to shut off the water from the USER'S property, a minimum fee of **\$30.00** will be charged for a re-connection of the service. The actual re-connection fee will be the current re-connection fee as set forth in Supplier's Bylaws, Rules and Regulations.

It is understood and agreed that the SUPPLIER reserves the right to determine the size of service connection to be used to supply water to the USER. A 5/8" X 3/4" meter will be used unless the USER contracts for a larger meter. A separate meter must be installed for each residence. A separate contract will be used by trailer parks when trailers are not supplied by individual meters.

The USER agrees to grant to the SUPPLIER its successors and assigns a perpetual easement in, over, under and upon land owned by the USER, with the right to erect, construct, install and lay, and thereafter use, operate, inspect, repair, maintain, replace and remove water pipelines and appurtenant facilities, together with the right to utilize adjoining lands belonging to the USER for the purpose of ingress to and egress from the said lands.

IN WITNESS WHEREOF, we have executed this agreement this _____, day of _____, 20 _____.
